

Enroll in Multi-factor Authentication

How to enroll your Labouré Office 365 account in multi-factor authentication (MFA) for the first time.

Written By: Edward Akers

Enroll in MFA

Step 1 — Sign In

The left screenshot shows the Labouré College of Healthcare login page. It displays the email address `britta_perry@laboure.edu` and a message: "More information required. Your organization needs more information to keep your account secure." Below this, there are links for "Use a different account" and "Learn more". A blue "Next" button is highlighted with a red rectangular box. At the bottom, it instructs the user to sign in using their full email address in the format: `FirstName_LastName@students.laboure.edu` for students and `FirstName_LastName@laboure.edu` for faculty and staff.

The right screenshot shows the "Additional security verification" page. It prompts the user to "Secure your account by adding phone verification to your password. View video to know how to secure your account." Under "Step 1: How should we contact you?", there are two options: "Send me a code by text message" (selected with a radio button) and "Call me". There are also dropdown menus for "Authentication phone" and "Select your country or region". A blue "Next" button is located at the bottom right. A disclaimer at the bottom states: "Your phone numbers will only be used for account security. Standard telephone and SMS charges will apply."

- Go to mail.laboure.edu.
- Sign in using your Labouré email credentials.
- Click **Next**.
- You will be taken to a page that says **Additional security verification**. You may choose to enroll in MFA using your phone or the [Microsoft Authenticator](#) app.
- If you would like to set up MFA by phone, proceed to Step 2. If you would like to use the mobile app, go to Step 5.

Step 2 — Set Up MFA by Phone

How should we contact you?

Configure mobile app

Complete the following steps to configure your mobile app.

1. Install the Microsoft authenticator app for Windows Phone, Android or iOS.
2. In the app, add an account and choose "Work or school account".
3. Scan the image below.

Next

Microsoft Login

Configure app without notifications

If you are unable to scan the image, enter the following information in your app.
Code: 439 822 221
Url: <https://mobileappcommunicator.auth.microsoft.com/activate/990925041/WUS>

If the app displays a six-digit code, choose "Next".

Next cancel

- Download the Microsoft Authenticator app to your smartphone [here](#). You can also search for "Microsoft Authenticator" on the iOS App Store or the Google Play Store.
- Under Step 1, choose **Mobile app**.
- Choose whether to authenticate your account by receiving push notifications from the app or by entering a six digit verification code provided by the app.
 - Please note that your phone needs to have an Internet connection in order to receive push notifications from the app. It does not need an Internet connection in order to utilize verification codes.
- Click **Set up**.
- Follow the instructions on-screen to configure the app, and click **Next** to finish the setup process.
- ***If you ever receive a notification asking you to approve a sign-in that you did not initiate yourself, do not approve the request.***
